AAMJIWNAANG ENVIRONMENT NEWS

INTRODUCTION TO THE DEFENSE OF INDIGENOUS RIGHTS

Recently, Aamjiwnaang Environment hosted a 2-day training session with Bruce McIvor who holds a law degree, a Ph.D. in Aboriginal and environmental history, is a Fulbright Scholar and author of *Standoff: Why Reconciliation Fails Indigenous People and How to Fix It*.

Representatives from Environment, Lands, Economic Development, Administration and Council were engaged through interactive discussion on the following:

- ⇒ Doctrine of Discovery
- ⇒ Inherent/Treaty/Aboriginal Rights -DEFINED
- ⇒ The duty to consult and accommodate
- ⇒ Assertion of rights
- ⇒ Obligation of the Crown
- ⇒ Indigenous Laws
- ⇒ Aboriginal Title

Our facilitator, Bruce, articulated the importance of defining who we are and creating a detailed record of our history and traditional knowledge and of particular interest was the fact that the Canadian Constitution protects our Indigenous Rights.

A primary goal was to expand and enhance our current knowledge base and increase our understanding of how to effectively assert our **INHERENT INDIGENOUS RIGHTS and TITLE** within Aamjiwnaang's Traditional and Treaty Territory.

We are now more informed about inherent and aboriginal rights and are ready to incorporate change in the important work that we do for our community and future generations.

COVID-19 ISOLATION REQUIREMENTS

If you have symptoms or have tested positive for COVID-19

Assume that you may have the virus and may be contagious. Symptoms include:

- fever or chills
- cough
- shortness of breath
- decreased or loss of taste or smell
- two or more of:
 - runny nose or nasal congestion
 - headache
 - extreme fatigue
 - sore throat
 - muscle aches or joint pain
 - gastrointestinal symptoms (such as vomiting or diarrhea)

If you have these symptoms, you **should** isolate:

- for at least five days if you are:
 - [fully vaccinated](#)
 - under 12 years of age
- for at least 10 days if you are:
 - over the age of 12 and not fully vaccinated
 - immunocompromised
 - live in a highest risk setting

Your isolation period begins the day **after** you noticed your symptoms or the day **after** you received a positive test result – whichever came first. The day you first noticed symptoms or took the test is considered day zero.

If you reach the end of your isolation period **and** have a fever or other symptoms, you must continue to isolate until your symptoms have improved for at least 24 hours (or 48 hours if the symptoms affect the digestive system) and you have no fever.

After you finish isolating

For five days (or 10 days if you are immunocompromised) after your isolation period ends, **you should wear a well-fitted mask in all public settings.**

You can temporarily remove your mask for essential activities (such as when eating in shared space at school/work while still maintaining as much distancing from others as

possible). You can participate in activities where masking can be maintained throughout, but you should avoid activities where mask removal would be necessary (such as dining out).

Once your isolation period is complete you should:

- avoid visiting anyone who is immunocompromised or at higher risk of illness (for example, seniors)
- not visit or go to work in any highest risk settings

If you live with someone who has symptoms or has tested positive for COVID-19

You **do not** need to isolate if one of the following applies to you:

- you have previously tested positive in the last 90 days and do not have symptoms
- you are over 18 years old and have received a COVID-19 booster dose and do not have symptoms
- you are under 18 years old and are [fully vaccinated](#) and do not have symptoms

Instead for 10 days after exposure:

- self-monitor for symptoms
- wear a mask and avoid activities where mask removal would be necessary
- do not visit anyone who is at higher risk of illness, such as seniors, or any highest risk settings (unless you previously tested positive in past 90 days)

If you do not meet any of the criteria above, you must isolate while the person with symptoms/positive test result isolates (or for 10 days if you are immunocompromised).

If you've been exposed to someone from another household with symptoms of COVID-19 or a positive test result

You are required to:

- [self-monitor](#) for symptoms for 10 days after your last exposure
- wear a mask, avoid activities where mask removal is necessary (such as dining out, high contact sports) and follow all other public health measures if leaving home
- do not visit any highest-risk settings (such as long-term care or retirement homes) or people who may be at higher risk of illness (such as seniors) for 10 days after your last exposure

Montee's Musical Musings

This weeks most popular songs - Top 10

Give them a listen, you never know what can spark your inspiration

About Damn Time - Lizzo

As It Was - Harry Styles

Sunroof - Nicky Youre feat. Dazy

When You're Gone - Shawn Mendes

2Step - Ed Sheeran Feat. Lil Baby

First Class - Jack Harlow

Late Night Talking - Harry Styles

I Like You - Post Malone Feat. Doja Cat

She's All I Wanna Be - Tate Mcrae

Flowers Need Rain - Preston Pablo Feat. Banx & Ranx

I do try to separate myself from the genres mentioned in this list. I do not think that they match my energy and I find it hard to find comfort while listening to some of them. I resonate more towards hip hop or trap, rarely trap metal but it is still apart of my taste.

Here are a few albums that I recommend if you are not into any of the songs on the top 10 list.

Man On The Moon III : The Chosen - Kid Cudi

Art Therapy

This is a simple form of therapy, but can be very effective for older adults, especially those afflicted with conditions such as Alzheimer's/dementia. It allows for a form of communication other than verbal speech, providing a more visual and sensory way of expression. It also helps provide a general sense of well-being.

Some examples of art forms for seniors include:

- Painting,
- Drawing/Sketching,
- Dance,
- Photography,
- Scrap-booking,
