 RE: **ACC Redesign – Cultural Expression**
Aamjiwnaang Cultural Centre
 BGAI Project No. 219660

The Aamjiwnaang Cultural Centre Project Team has been working to determine the needs and goals of the proposed new building. The Team submitted the project programming report to Council in February of 2023. Council approved the proposed Level A building with planning for Level B to be added in the future. That approval was to determine the types of spaces and size of the building.

The next goal is to identify key expressions of Aamjiwnaang’s culture that are to be integrated and celebrated through the design of the cultural centre building. We are looking for community input on the meaning and importance of items and concepts that have been identified.

Please use this form to express how the following items (or others) have significance to yourself and your community and why they should be incorporated into the design of the cultural centre building.
