NOTICE

Attention Aamjiwnaang Members;

As we continue to monitor the elevated benzene levels in the Band Office area, we wanted to provide some clarity to community members on the 4 different monitors, and the areas in which they are located. They are as follows:

- Ada (Lockridge) Rogers and AFN Sportscenter (NEW): located outside of the Band Office and the new Education Building.
- Wilson Plain Sr.: Daycare and School.
- Errnol Gray Sr.: Health Centre.

We have continued to monitor levels and will be reopening all buildings today, May 9th, and basing any closures under the below readings guidelines moving forward.

If benzene measurements at a specific location reach 27 ug/m³ or higher per the CASA website, the buildings in that area will close for the remainder of that day and the following day.

We will continue to provide updates as they become available.

Miigwetch for your understanding and cooperation.

Aamjiwnaang Band Council
